### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 62-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-75, 1-26 and 1-39 of copending Application No. 10/013973, 10/026,415 and 10/084,763 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because all teach systems having a membrane for sample acquisition and a reading device to analyze the sample for the analyte(s) of interest.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 62-80 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 0308770 (noted as "EP" hereafter and cited in the 6/12/06 IDS) or DeSimone et al. (USP 4,833,088).

See the appropriate paragraph of the 8/17/06 Office action.

***Response to Arguments***

Applicant's arguments filed 12/26/06 have been fully considered but they are not persuasive.

Applicants' state the instant invention differs from the cited prior art because "... the light aperture itself being sized to match the detection zone ... Such an arrangement is neither disclosed nor suggested by DeSimone et al.". These remarks are not commensurate in scope with the pending claims. Claim 68 mentions an "aperture", but does not provide the detailed structure alleged above. The Office maintains the rejections are proper and clearly anticipated the instant claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
